About Bitext

Bitext has broken through the barriers that block multi-language text analysis. The company's Deep Linguistics Analysis Platform supports 77 languages at a lexical level and +20 at a syntactic level and makes the company's technology available for a wide range of applications in Artificial Intelligence, text analytics and the new wave of products designed for voice interfaces such as chatbots and assistants.

INFLECTIONAL FORMS LIST

includes all the standard inflectional forms for nouns, verbs, adjectives, prepositions, conjunctions, etc. Each form will be annotated with the lemma (root form), POS, and morphological attributes (tense, person, number, mood, gender, case, declension, degree).

DERIVATIONAL FORMS LIST

includes all the standard derivational forms including comparatives and superlatives. Each form will be annotated with the lemma (root form), POS, and morphological attributes (tense, person, number, mood, gender, case, declension, degree).

NAMED ENTITIES FORMS LIST

includes the data regarding named entities comprising person names, places, companies and organizations. Each form will be annotated with the lemma (root form), POS, and morphological attributes (tense, person, number, mood, gender, case, declension, degree and entity-type).
